

device

```
graph BT; router[router] --> device[device]
```

A diagram illustrating a relationship between two entities. At the top, a rectangular box with a thick black border contains the word "device" in a large, black, serif font. Below this box, a vertical black line extends upwards, ending in a solid black arrowhead that points directly at the bottom center of the "device" box. At the base of this arrow, another rectangular box with a thick black border contains the word "router" in a large, black, serif font. The entire diagram is set against a plain white background.
